

# BEE FRIENDLY!

## Why help pollinators?

Bees, butterflies and other pollinators have been in severe decline for the past thirty years.

Pollinators are essential to pollinate crops, orchards, and wild and garden flowers.

---

## You can help

**Plant** bee-friendly flowers and plants

**Protect** nesting sites or maybe even make a bug hotel!

**Avoid** chemicals that harm pollinators  
And buy plants that are free from neonicotinoids
